|                                                         |           |
|---------------------------------------------------------|-----------|
| <b>About this manual.....</b>                           | <b>1</b>  |
| <b>Companion system overview.....</b>                   | <b>3</b>  |
| Introduction to the Companion system .....              | 3         |
| Base Stations.....                                      | 5         |
| Radios and antennas.....                                | 5         |
| <b>Base Station location .....</b>                      | <b>9</b>  |
| Base Station installation guidelines .....              | 9         |
| Installing multiple Base Stations in a cell center..... | 11        |
| <b>Companion Deployment Tool.....</b>                   | <b>13</b> |
| Using the CDT .....                                     | 13        |
| CDT components.....                                     | 14        |
| How the CDT works.....                                  | 14        |
| Interpreting the portable's tones .....                 | 16        |
| Conducting a CDT operational check.....                 | 17        |
| Cell boundary values .....                              | 18        |
| Using the CDT to determine cell boundaries.....         | 19        |
| <b>Site planning basics .....</b>                       | <b>21</b> |
| The basics of planning a site .....                     | 21        |

|                                                                    |           |
|--------------------------------------------------------------------|-----------|
| Site planning prerequisites.....                                   | 22        |
| Required site information .....                                    | 22        |
| Labeling a floor plan.....                                         | 24        |
| Cell center location.....                                          | 26        |
| Covering outdoor areas.....                                        | 26        |
| Covering a single floor indoor area .....                          | 29        |
| Single-floor coverage techniques.....                              | 31        |
| Determining the number of Base Stations per cell.....              | 37        |
| Special cases.....                                                 | 38        |
| Reviewing your work .....                                          | 41        |
| Checking system capacity.....                                      | 41        |
| Reviewing with the customer.....                                   | 41        |
| Providing floor plan information.....                              | 42        |
| Providing provisioning record information .....                    | 42        |
| <b>Planning a Sample Site.....</b>                                 | <b>43</b> |
| Using what you learned.....                                        | 43        |
| Sample Site: Site information.....                                 | 43        |
| Sample Site: Indoor cell center location.....                      | 45        |
| Sample Site: Determining the number of Base Stations per cell..... | 48        |
| Sample Site: Reviewing your work.....                              | 53        |
| Example outdoor cell center location .....                         | 54        |
| <b>Planning complex sites .....</b>                                | <b>57</b> |
| Planning a multi-floor coverage area.....                          | 57        |
| Atriums.....                                                       | 57        |
| High-rise buildings.....                                           | 58        |
| Differing floor areas.....                                         | 61        |
| Planning an area of high portable density.....                     | 63        |
| Example of a high portable density area.....                       | 64        |

---

|                                                            |           |
|------------------------------------------------------------|-----------|
| Planning where there is an existing Companion system ..... | 66        |
| Adjacent systems.....                                      | 66        |
| Overlapping systems.....                                   | 66        |
| Planning multiple systems.....                             | 67        |
| Parameters affecting multiple systems .....                | 67        |
| System names.....                                          | 68        |
| Guidelines.....                                            | 68        |
| Planning for multiple systems.....                         | 69        |
| Examples of four types of multiple systems.....            | 70        |
| <b>Appendix A: Derivation of traffic procedure.....</b>    | <b>85</b> |
| Derivation of traffic procedure.....                       | 85        |
| Basic traffic procedure.....                               | 85        |
| Detailed traffic procedure.....                            | 86        |
| <b>Appendix B: Using indoor external antennas .....</b>    | <b>89</b> |
| Selecting the appropriate indoor antenna.....              | 89        |
| Simulating indoor external antennas with the CDT.....      | 91        |
| Using coaxial cable and an external antenna.....           | 91        |
| Changing the cell boundary value .....                     | 91        |
| <b>Appendix C: Fading .....</b>                            | <b>93</b> |
| Fading.....                                                | 93        |
| <b>Appendix D: Key planning concepts.....</b>              | <b>95</b> |
| Key planning concepts.....                                 | 95        |
| Synchronization.....                                       | 95        |
| Power control.....                                         | 96        |
| Portables.....                                             | 96        |
| Base Stations.....                                         | 96        |
| Optimizing power control .....                             | 97        |
| Base Station and cell relationships.....                   | 97        |

|                                            |     |
|--------------------------------------------|-----|
| Auto administration.....                   | 97  |
| Portable originated calls.....             | 98  |
| Optimizing portable originated calls ..... | 99  |
| System originated call.....                | 99  |
| System .....                               | 99  |
| Portable.....                              | 99  |
| Optimizing system originated calls.....    | 100 |
| Hand-off.....                              | 100 |
| Optimizing hand-off.....                   | 101 |
